

Space Ethics - An Introduction

TWO-DAY INTENSIVE COURSE

Should we colonize Mars? Mine asteroids? Modify humans for deep space? Or leave the cosmos untouched?

This two-day intensive course introduces you to the ethical challenges of humanity's expansion into space. From AI astronauts to alien encounters and space militarization, we'll debate the big questions shaping our cosmic future.

You'll learn the basics of philosophical ethics, from Kant to utilitarianism, and apply them to real-world issues in space exploration, technology, and policy.

No prior knowledge needed! Just curiosity and an open mind.

Join us for interactive case studies, lively debates, and a journey to the moral edge of the universe.
